# Admob Mediation Integration Guide

Before You Start

- Please make sure you have correctly integrated Admob Rewarded Video or Interstitial or Banner Mediation into your application.
- Support banner, interstitial and rewarded video;
- Support both of 32 bit and 64 bit operating systems;
- Support iOS 8.0+;
- Please make sure you have signed up on Applins Platform to get your own slot id for test. If you haven't signed up, please contact us.
- Please make sure you have added an app and at least one ad slot in Applins Platform
- click here to download the mediation adapter

Set Up Applins as your ad sources in Admob

1. Create apps and ad unit id in Admob console, as below

> ADD APP

ADD AD UNIT

2. Create Mediation Group, as below
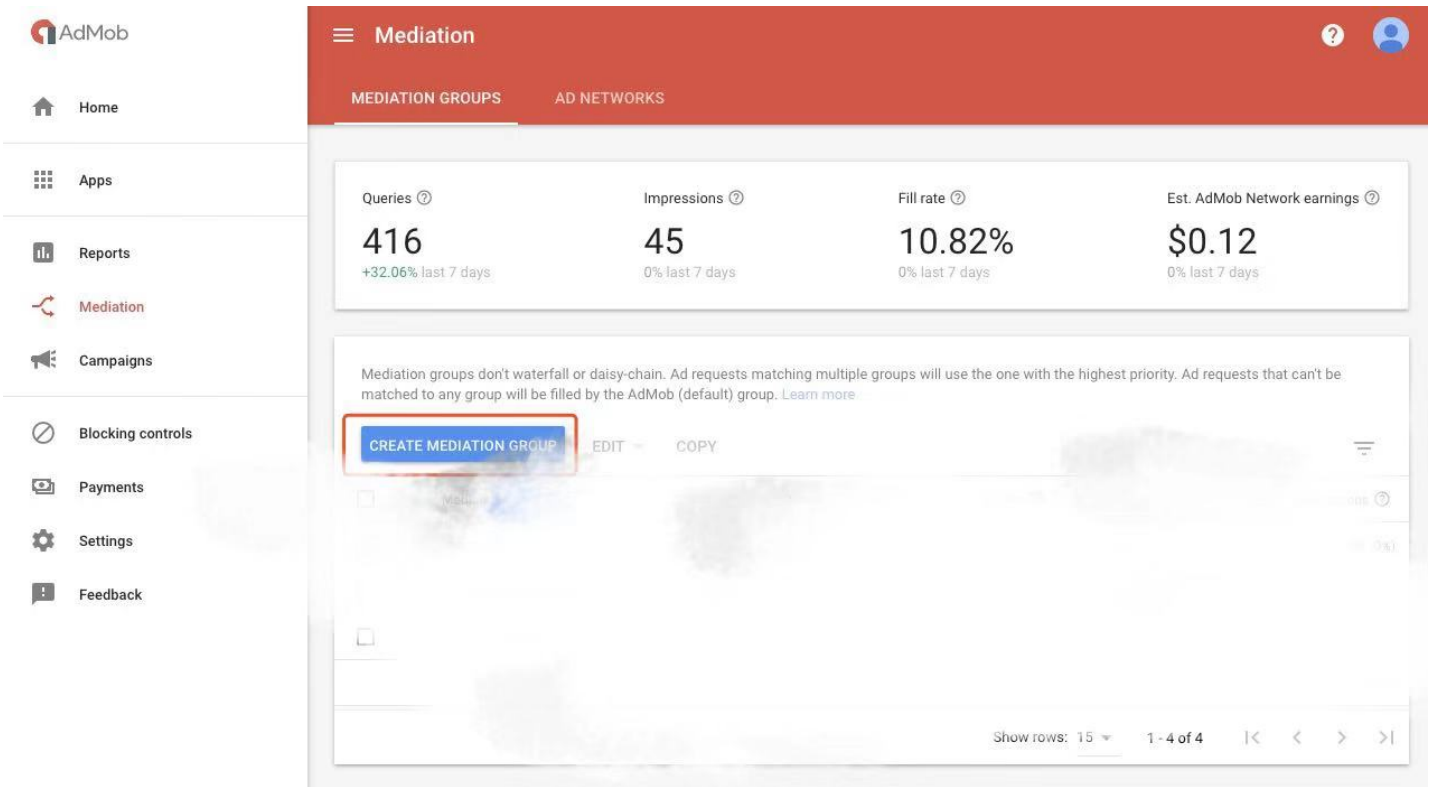

3. Create the Ad Unit in your Admob dashboard that corresponds to your Applins slot ID

4. Add Applins custom event in Admob console, as below

Name	Example
	7 / 80

Ad unit format	Rewarded video

Platform	Android

Location Select locations to target ⓘ

- ◉ All countries and territories
- ◯ Target countries and territories
- ◯ Exclude countries and territories

Status	🔵 Enabled

Ad units

ADD

Ad sources

ADD AD NETWORK   ADD CUSTOM EVENT   REMOVE

| ☐	Ad source	Optimized ⓘ	eCPM ($ USD) ⓘ
☐	AdMob Network	✓	Real-time

Show rows: 15 ▾   1 - 1 of 1 |< ‹ › >|

SAVE   CANCEL

```
Class Name: GADMAdapterApplins (example)
Parameter: 260 (Applins slot id)
```

5. Copy GADMAdapterApplins.h and GADMAdapterApplins.m into your code folder

Add files to your project !!! You should Call Applins init Interface in Application Start!!!

```
- (BOOL)application:(UIApplication *)application didFinishLaunchingWithOptions:(NS
Dictionary *)launchOptions {
     [[Applins shareSDK] initSDK:slotID];
     return YES;
}
```

6. Admob Rewarded Video Integration

See this link

Done! You are now all set to deliver Applins Ads within your application!
